SKILLS

Programming Python, R, JavaScript, TypeScript, Java, Bash
Analytics & ML Python (Pandas/scikit-learn/Keras), R, SQL, Power BI, Tableau, Apache Spark
Development Django (DRF), React, Celery, AWS (S3/Lambda), MySQL, GCP (BigQuery/App Engine), Claude Code, Grafana

WORK EXPERIENCE

SchoolLinks

Jan. 2026 - Present

SENIOR SOFTWARE ENGINEER, TEAM LEAD | DJANGO, REACT

Fairfax, VA

- Designed a database-backed architecture for our ETL framework and a full-stack rebuild of the user upload interface in React and Django, reducing page load latency by over **90%** and enabling more granular district-specific file configurations
- Architected a standardized framework for third-party data integration across sources including Peterson's, College Scorecard, and BLS, replacing ad-hoc scripts with idempotent pipelines, audit trails, and unified orchestration
- Lead a team of **5** engineers as the Data Integration pod lead, owning roadmap planning, sprint execution, cross-pod incident coordination, and technical interviewing
- Drove a **90%** increase in team ticket throughput and reduced PR cycle time in the first year by formalizing workflows in a dedicated engineering handbook

SchoolLinks

Jun. 2023 - Dec. 2025

SOFTWARE ENGINEER | DJANGO, CELERY, POWER BI, AWS

Austin, TX

- Maintained and scaled our Django/Celery ETL framework processing daily data for **1200+** K-12 school districts across rostering and SIS integrations, including OneRoster, Clever, and PowerSchool
- Engineered and owned our metrics framework powering all org-wide and external-facing analytics, building out a Lambda-based Plotly visualization service and configurable PDF/CSV reporting layer used in district reviews
- Developed our HubSpot and Gainsight integration frameworks, enabling bidirectional sync of account and contact data and the metrics behind our district health scores
- Overhauled all in-app Power BI dashboards, rebuilding the semantic models and DAX measures along with the data pipelines, improving data reliability while reducing refresh time by over **85%**
- Resolved the highest individual volume of production issues across the engineering team as primary triage owner for cross-pod data and integration tickets

U-M Medical School Radesky Lab

Jan. 2023 - Jun. 2023

RESEARCH ASSISTANT | PYTHON, NLP, MACHINE LEARNING, GCP

Ann Arbor, MI

- Built and deployed a Dash web application on App Engine that scraped, processed, and visualized metadata and reviews for **1000+** mobile apps, replacing the research team's manual collection workflow
- Trained text classification models using TF-IDF features, NLTK, and Random Forest to identify manipulative app features targeted at children

U-M Center for Academic Innovation (CAI)

Feb. 2022 - May 2023

DATA MANAGEMENT FELLOW | PYTHON, SQL, TABLEAU

Ann Arbor, MI

- Led the technical implementation of Denodo data virtualization, configuring JDBC connectors and views across MySQL, PostgreSQL, Oracle, MariaDB, Google Sheets, and Salesforce for unified analytical access
- Constructed a unified Tableau Server dashboard tracking product growth and student engagement across CAI's **11** learning products in real time via live Denodo connections
- Ran regression analyses and built Tableau visualizations to quantify ECoach's impact on student grade outcomes

DataCamp

Jun. 2022 - Aug. 2022

DATA SCIENCE CONTENT DEVELOPMENT INTERN | PYTHON, R

New York, NY

- Modernized the content of **60+** data science courses by addressing Python and R package updates and learner feedback
- Optimized autograders for **300+** Python/R exercises to more accurately evaluate submissions and deliver personalized feedback

EDUCATION

University of Michigan-Ann Arbor (U-M)

Ann Arbor, MI

MASTER OF SCIENCE IN INFORMATION (DATA SCIENCE)

Aug. 2021 - Apr. 2023

National Taiwan University

Taipei, Taiwan

BACHELOR OF BUSINESS ADMINISTRATION IN INTERNATIONAL BUSINESS

Sep. 2016 - Jun. 2020
